R. C. Receives Mailing Instructions For Bombed Areas

2 Boxes Refugee Clothing Sent
To Headquarters; Organization
Still Shows Healthy Bank Balance

The regular meeting of the local branch of the Canadian Red Cross was held on Monday evening.

Secretary Mrs. Claxton stated she had received instructions regarding mail being sent to bombed areas in England in search of missing friends or relatives. A number of depots have been set up in those bombed areas and any local person desiring to send letters to friends in cities such as Coventry, is well advised to first contact Mrs. Claxton who will instruct them regarding the correct procedure to follow.

A bill for \$89.00 from Alberta headquarters for goods supplied was passed for payment.

President Dutil and Treasurer MacAulay will interview Mr. Harry Sela, who has advised the Red Cross that he is willing to sponsor Saturday night dances, the Red Cross to receive 50 per cent. of the proceeds.

Two boxes of refugee clothing have been sent to Alberta Red Cross headquarters since Dec. 9.

The subject of issuing permits to organizations desiring to use the Red Cross name in advertising was again discussed. Unless an organization is willing to give 50 per cent. of the proceeds it will not be allowed to use the name of the Red Cross for advertising purposes.

Treasurer Norman MacAulay reported that \$435.28 still remained in the association's bank account. A total of \$720.00 has been sent to Alberta headquarters in recent weeks.

Grand Mistress Visited Crescent Lodge L.O.B.A.

Presented With Electric Kitchen
Clock; Installation of 1941
Officers; Sis. Blanche Clary
Worthy Mistress for Second
Term.

The regular meeting of Crescent Lodge, L.O.B.A., No. 699, usually held on the first Wednesday of each month was postponed till November 12 to suit the convenience of the visit of the R.W.P. Grand Mistress, Sister Grace Jones.

A hot chicken supper preceded the meeting at 6:30 p.m. Following the banquet, Worthy Mistress Blanche Clary, assisted by Sister Holmes, presented the grand mistress with a beautiful electric kitchen clock, Sister Jones expressing her thanks for the gift.

Sister Jones, in the meeting following, conducted the business of election officers.

The December meeting was held on the 4th. New business was the installation of officers. Presiding officer, Sister Holmes; director of ceremonies, Sister Elizabeth Dunlop; recording secretary, Sister Elizabeth Dunlop; deputy, Sister Mary McKinnon; chaplain, Sister Cassie Ash.

Officers for 1941 are:

W.M., Sis. Blanche Clary; I.P.M., Sis. M. E. Reid; D.M., Sis. Ruth Blower; Ch., Sis. Mary McKinnon; R.S., Sis. Elizabeth Dunlop; D. of C., Sis. Margaret Dunlop; F.L., Sis. Mary Ferguson; D.L., Sis. Ethel Burrows; I.G., Sis. Cassie Ash; guardian, Sis. Mary McQuarrie; committees, Sisters McKinnon, Ferguson and Dunlop; auditors, Sisters Dunlop, McKinnon and Ferguson.

Sister Holmes presented Worthy Mistress Blanche Clary with the jewel, and on receiving same Sister Clary expressed her thanks and appreciation for the co-operation she had received in 1940 from the officers and members and extended to the incoming officers best wishes for 1941.

Mrs. Rose was called to her home at Oak Lake, Manitoba, on Monday on account of serious illness of her mother.

Curling Club to Sponsor Bonspiel Prizes

Subscription Being Taken to
Raise Sufficient Finance; Three
Rinks Expected to Represent
Coleman at 'Spiel.'

A number of local sport-minded persons are not going to allow the International Coal and Coke Co. trophy to be supported by another town or be withdrawn from the C.N.P. bonspiel which starts at Blairmore next Monday morning.

Sixty dollars is all that is required to meet the expense of prizes and affiliation fee and already a fund has been started to raise that amount. One merchant has donated one of a set of four prizes and it is possible other business men may follow his lead. It seems certain that three rinks will enter the big 'spiel'. Jim Kerr, Harry Boulton and Angelo Gentile have their rinks practically complete and should another skip wish to enter the 'spiel' it would seem that he would have no difficulty filling a rink.

The Crow bonspiel will start 9 a.m. Monday and will be supervised by L.S. Herchmer, association secretary of Fernie, and Milt Congdon, Blairmore secretary.

Merchants Ask For Closing By-Law

Appoint Returning Officer;
Relief Restrictions Slackened;
Water Remains Pure.

Regular meeting of the council was held on Tuesday evening. Present Mayor, Attribous, Councillors Abcasoff, Atkinson, Balloch, Ford, Jenkins and Kerr.

A petition, containing 22 names of local merchants, asking that a by-law be passed regulating closing hours, was placed before the council. It asked that stores close at 5 p.m. Tuesdays, Thursdays and Fridays. Close at one p.m. on Wednesdays and 7:30 p.m. on Saturdays. Before passing the by-law council will give it detailed study. The secretary was authorized to write the Department of Trade and Industry asking for advice on the matter.

A letter was received from the provincial government cancelling two circulars recently received by the council. Cancellation of those circulars helps to relieve the harsh restrictions that have been in force regarding relief. Two water samples sent last month to Edmonton were reported to be pure. Mrs. Kate Johnston appealed to council to protect her property on Second street from damage suffered from trucks and cars backing out of a service station parking lot located alongside. She also asked that a light be installed at the entrance to the alley which runs alongside her property. Councilor Anthill was authorized to investigate.

A letter was received from the chief municipal inspector in reply to a question sent him by council. The letter stated that under the Towns and Villages Act there was no provision for adding names to the voters' list after council had sat as a court of revision of the voters' list. This means that no one will be sworn on the day of the municipal election to be held in February. A Balloch was appointed as returning officer and Miss Gladys Lees as assistant.

Mrs. Annie Hart asked council to place her 12-year-old daughter in a home. Council will ask the Department of Child Welfare to investigate. Dog tags for 1941 were authorized purchased.

It was recommended that the flag flying at the town hall be raised and lowered daily.

Mr. and Mrs. J. S. D'Appolonia left during the week for their ranch at Creston, where they intend residing for an indefinite period.

Members of the bridge club met at the home of Mrs. A. E. Graham last Wednesday evening. The highlight of the evening was the presentation to a departing member, Mrs. Geo. Kellock, of a handsome travelling case.

DUNKIRK

On Dunkirk sands at break of day,
The British army stood at bay.
And the sad and bitter tale I'll tell,
How nearly into German hands they fell.
They went five hundred thousand strong,
To Flanders fields to fight a wrong.
There in the van they led the fight,
And were stemming, too, the German might.
Never a thought had they of defeat,
When lo, they got the word "retreat."
But when they saw that on their flank,
The enemy were pouring rank on rank,
While their Allies stood so calm and meek,
With their rifles lying at their feet.
They knew then that by a traitor's hand,
They were stranded in a foreign land,
And as they were outnumbered sore,
They turned their face for Dunkirk shore.
As with bitter hearts they turned away,
The rearguard carried on the fray.
They stood firm and true that gallant band,
For an army's fate was in their hand.
But the enemy reinforced with tanks,
Broke through those brave and noble ranks,
And there they stood at break of day,
Tired and weary and at bay.
But the enemy showed no mercy there,
They shelled and bombed them from the air,
Till it seemed as if there at their post,
Our gallant army would be lost.
But over the sea there hove in sight,
The British Navy in all its might,
Soon their guns began to roar,
"Sweet music" there on Dunkirk shore.
Then the R.A.F., too, came in sight,
And put the enemy planes to flight;
Also over the sea with the navy came,
Boats of every size and name;
Manned with volunteers so brave,
Their soldier laddies came to save,
And there amid the cannons roar,
They sailed right in to Dunkirk shore.
Soon they were filled with weary men.
Straight they made for Britain then,
And though the bombs came down like rain,
Yet back they came again and again.
And with the Navy watching all the while,
They got our army back to Britain's Isle.
Now they're home on their native plain,
And rested, fed, and ready again,
Re-armed they're eager for the chance,
To sail once more to the shores of France;
Once again the foe to meet,
For this time they know they want retreat,
This time they'll meet them rank for rank,
Gun for gun, and tank for tank;
They'll remember that day on Dunkirk shore
And set their Allies free once more,
And never again at break of day,
Will the British army stand at bay.

Caledonians to Sponsor Burns' Night Jan. 24

To be Held Jan. 24 in L.O.O.F.
Hall; Tickets Now Being Sold.

Coleman Caledonians Society will again sponsor their annual Burns' night, the date having been set for Jan. 24. Due to the enormous amount of work involved in preparing the banquet and arranging the program it had been originally intended to confine the attendance to numbers, who in turn were allowed to bring a friend each. However, it is reported that the plan has been changed to sell a specified number of tickets. In previous years attendance has averaged approximately 130 persons.

Burns' night ranks with the most enjoyable social events of the winter season and the society leaves no stone unturned to make each banquet bigger and better than the previous year.

Among the speakers expected on the program are Dave Gillespie, whose address to the haggis is one of the highlights of the program, and Dave Young, general manager of the Hillcrest-Mohawk Collieries, who skillfully handled the toast to the "Immortal Memory" last year. Through unconfirmed reports that efforts are being made to secure an address from W. L. Carriere, superintendent of the E.P. ranch, and president of Hillcrest-Mohawk Collieries, Ltd.

Following the program and banques the floor will be cleared and a night of gaudy and Scotch dancing will be enjoyed.

Elks Held Installation of Officers Thursday

Forty Blairmore Members
Present; Acting D.D.G.E.R.
Harold Pinkney Presided.

Officers for the ensuing year of Coleman Elks Lodge were installed into office last Thursday evening. Acting D.D.G.E.R. Harold Pinkney, of Blairmore, presiding, in the absence of the district deputy, Sidney White, who was sick. P.D.G.E.R. Bro. Mack Stigler assisted.

The officers installed included:
I.P.E.—F. Barvingham.
Exalted Ruler—R. Bell.
Leading Knight—J. Smith.
Loyal Knight—N. J. Nicholas.
Lecturing Knight—Fred Emery.
Treasurer—G. Evans.
Secretary—George A. Brown.
Chaplain—Wm. E. Read.
Esquire—Herb Sherratt.
Inner Guard—Walter Williams.
Tyler—Joseph Spivak.
Trustee—W. Dutil (3 years), F. Barrington (2 years), J. M. Rushton (1 year).

Following the installation P.D.D.G.E.R. Bro. Stigler presented P.E.R. Bro. Frank Barrington with a pen set in appreciation of his filling the exalted ruler's office for the past term. The presentation was followed by a social time.

Miners Defeat Bearcats in Free Scoring Game

Pietroszko High Scorer With
Three Goals; Roughead 2, Jenkins
and J. Trotz Score; Kubic
Paces 'Cats.'

A very poor crowd turned out to watch Coleman Miners creep to within one point off second place on Wednesday evening as they trounced the second place Blairmore Bearcats by a 7-5 score. Pietroszko with three goals and three assists, and Roughead with two goals and four assists, paced the locals. Jenkins and Joe Trotz scored Coleman's other goals.

CARD OF THANKS

We wish to thank our kind friends and neighbors for their acts of love and sympathy during our recent loss, and also extend grateful thanks for the cards and beautiful floral tributes to our loved one—Mrs. James Fraser and family and Mr. and Mrs. William Fraser and family.

Summit Lodge Held Installation of Officers

Installing Master Was Wor.
Bro. J. O.C. McDonald; A. F.
Short, Wor. Master

The installation of officers of Summit Lodge A.F. and A.M., Coleman, was held in the lodge room on Jan. 2, 1941. The installing master was Wor. Bro. J. O. C. McDonald, past district deputy, District No 8, G.R.A. The following officers were duly installed:

Wor. Master—A. F. Short.
Sen. Warden—J. A. Park.
Jun. Warden—N. E. MacAulay
Sen. Deacon—A. B. Westworth.
Jun. Deacon—J. A. Howarth.
Sen. Steward—A. Galbraith.
Jun. Steward—W. Lonsbury.
Treasurer—J. Emmerson.
Secretary—M. W. Cooke.
Dir. of Cer.—A. Anderson.
Tyler—S. C. Short.
Refreshments followed the installation.

Lions Campaign Thermometer Rising

Good Response Being Received;
Canvassing Expected to Take a
Few More Weeks.

The Lions' War Savings campaign thermometer has risen six inches during the past week as the campaign committee warmed up to its work and went after the signatures of approximately 1000 wage earners.

It has been difficult for a number of the members to go out on the campaign during the past two weeks as they have been busy taking inventory at their stores. However, this work has just about been completed and they are now free to devote their attention to the campaign.

The few members who have been engaged getting pledges report a very good response. Sixty-three cards have been signed and the average amount signed for is \$3.00 per pay period.

One pleasing feature of the campaign, as far as the canvassers are concerned, is the courtesy with which the general public receives them. It is really a pleasure to be on the canvassers' committee. Many parents seem grateful of the opportunity to sign those pledges, as they are registering the certificates in their children's names and in doing so start a savings account for the youngsters which will amount to something worth while as the years roll by.

Many have failed to notice the huge thermometer located alongside the post office. It is 100 inches high and is nailed to the post office building on Main street between the two large frames of glass. Archie Wragg will paint the thermometer each Saturday noon. Sign your pledge card today and keep the thermometer rising.

GIRL GUIDE NOTES

Memorial services throughout the Guide and Scout movement, will be held on Jan. 19. The Guides will attend church services on this date. The Marguerite, Poppy, Forget-me-not Bluebell and Cadet Patrols will attend the service at 7 p.m. in St. Albin's church, while the Shamrock Patrol will attend the 9 a.m. service at the Roman Catholic church. It is expected that the Brownie Packs will also attend.

The library is coming along. People have been very kind in supplying us with books, and promise of several more was made this week.

On Saturday we plan to hold a candy sale in the club room of the United church. As this type of sale was quite successful two years ago we are looking forward to a good day.

Mrs. James Ford has recently returned from High River and is now the guest of her daughter, Mrs. J. Shields.

The Crescent Lodge, L.O.B.A., No. 599, will hold its annual Tea and Sale of Work on March 29. Please reserve this date.

Mrs. George Kellock, accompanied by Mr. and Mrs. Jim Kellock, left on Tuesday for Midnapore, where they will take up residence. Mrs. Kellock came to Coleman in 1910 and has been a continual resident up until this week.

GIVE the family a special treat with the most tempting ice cream imaginable! It's cheap and simple to make!

Take a package of Jell-O® Ice Cream Powder with a quarter of half-sifted, half cream. Place the bowl outside on the window-sill in freezing weather. Stir a few times and let O' Man Winter do the rest. Grocers sell it in 5 delicious flavours. Clip out this recipe and order several packages from your grocer now.

JELL-O ICE CREAM POWDER

Advancing The War Effort

While the prosecution of the war is properly and necessarily claiming the first attention of the people of Canada at the present time and almost to the exclusion of internal affairs, at the same time the proposal of the federal government to implement in legislation the recommendations of the Siros-Sirois report in the immediate future is recognized as a matter of great import.

It is perceived, dimly perhaps, by a large section of the citizenship that these recommendations are epochal in character; in fact, it is not too much to say that the more ranks with Confederation itself as one of the most important in the history of the country to date. If the principal objectives of the report are translated into legislation and made operative, it will not only have a very important bearing on the future destiny of the nation but will have, or should have, a beneficial effect on the Canadian war effort and war economy.

The main objective of the Rowell-Sirois report can be boiled down to an effort to redefine the functions of the several governmental units of the country in such a manner as to enable them to operate more efficiently and more economically. This objective will be achieved if, as a result of the plans outlined, duplication and overlapping of administrative effort is eliminated and sufficient sources of revenue are made available to each authority to enable it to carry out its duties without having to trespass on the proper revenue sources of the others. This, of course, involves, reallocation of the duties and responsibilities of each of the governmental units—federal, provincial and municipal and a reassignment of their several spheres of taxation.

Au Epochal Event

It is appropriate to point out at this stage that the Rowell-Sirois commission, while taking cognizance of the difficulties experienced in municipal administration under present conditions, involving increasing demands for services and incommensurate sources of revenue, properly took the attitude that the scope of its duty lay in reconciling the several responsibilities and sources of income as between the federal and provincial authorities, leaving it to the provinces to make such adjustments as might be necessary between themselves and their offspring—the municipalities.

Such far-reaching and widespread adjustments as between the administrative responsibilities and economy of the federal and provincial authorities as are recommended by the Commission are fully justified at the present time, not only on the ground that the redefinition of spheres will advance the internal economy of the country, but will also do much to further the effectiveness of the war effort.

The federal government is charged with the responsibility of carrying on Canada's contribution to the war, and it is imperative that as much as possible of the available finances and resources of the country be diverted to that effort until victory is won. Hence, it is the duty both of the federal government and the provincial and municipal administrations to economize on expenditures on internal affairs to the nth degree. The reason is obvious, there is only so much money and effort available for the conduct of the war and the operation of home services. Every dollar that can be diverted from internal administration and services to the war effort means another nail for the Nazi coffin.

Killing The Goose

As the Montreal Herald said in a recent editorial:

"In view of the heavy federal taxation, and perhaps still heavier taxation to come, it is necessary to hold provincial and municipal taxation not intended for war effort to a minimum or the total load will be unbearable and the 'goose that lays the golden eggs' will no longer be able to function normally."

"By the law of diminishing returns the financial pressure on trade and industry might seriously react on war and local taxation purposes through the reduced revenues of trade and industry."

"Still higher income taxes are to be imposed by the Dominion government, and provinces and municipalities continue to superimpose on these local taxes for non war purposes, the time is approaching when retail and other business and the individual citizen will be too badly crippled to provide in the measure of which they are potentially capable for the defeat of the Axis powers."

"Apart from this, provincial and municipal sales taxes, supernumerary water taxes, radio taxes, telephone taxes, are other forms of diverting taxation from the purpose of winning the war to local purposes which have no relation to the pressing objective."

If the implementation of the Siros recommendations into legislation has among other things the laudable effect of inspiring more economical local administration, thus releasing more money for the war effort, something worthwhile will have been accomplished, not only for the immediate present, but in the future.

Then, too, by eliminating some of the inequities which exist between governmental units, the new economy should make a real contribution towards the consolidating of that spirit of unity among the people of the country which is so absolutely essential to effective war effort.

He Meant Well

From a Liverpool church magazine: "The minister will be very pleased to hear of the illness of any members of the congregation or of any mis-naps which may befall relatives, at present with the Forces."

Nettles were harvested in several regions in Denmark to be threshed and used for the same purpose as flax.

Richard Delner produced a vegetable cross between a tomato and a sweet bell pepper; it is called a pepper tomato.

From Army Kitchens

Aluminum Pots And Pans Taken For Making Plans

Before leaving the War Office to become Foreign Secretary, Anthony Eden ordered 500 tons of aluminum pots and pans from army kitchens given to the Ministry of Aircraft Production—enough to make 500 airplanes. For months past such metal contributed by housewives has been used in fabrication of airplane parts.

Aeroplanes flying at an altitude of 10,000 feet find only about one-half the air resistance encountered at sea level.

Sweden's sugar beet crop, threatened by shortage of labor, was saved by the voluntary assistance of soldiers from various training camps.

Necessary Part Of Diet

All Vegetables Are Valuable For Their Vitamins And Minerals

Do you eat enough vegetables? Valuable as they are in minerals and vitamins, vegetables must be included in the things we eat. So states an article in the current issue of the magazine "Health," prepared by the nutrition committee of the Health League of Canada.

Not all vegetables are equally valuable from a nutritive point of view, the article points out. Some vegetables supply iron, others do not. We get Vitamin A from one kind of vegetable and Vitamin C from another. Cabbage, spinach and carrots are good sources of vitamin A, which is necessary to maintain normal vision and to prevent disease. Green cabbage is much richer in vitamin A than white cabbage. The outer leaves of cabbage are more valuable than the inner heart.

Without vegetables and fruit, people would be deprived of the important vitamin C, which safeguards us against scurvy. Tomatoes, cabbage, turnips and potatoes are chief sources of this vitamin. Orange juice and tomato juice also are good.

Cabbage and green leafed vegetables are valuable in their iron content, needed to prevent anaemia. Dried beans are also good iron producers. At least two vegetables should be served every day.

Man Is Expert Knitter

Ontario Farmer Says He Taught Himself 64 Years Ago

Knitting is not a woman's monopoly! Nehemiah Ogden of Unionville, Ont., says so. He is a 72-year-old man who has been knitting for 64 years and can outknit most of the women in the locality, it is alleged! "Most of the women admit it!"

"I started knitting when I was a boy of eight," he stated. "But I had to teach myself. I hid in the barn while I was doing it, because any boy caught knitting in those days would be severely disciplined. Why even today the women seem to think they should do all the knitting. Personally, I think machines would serve just as well and save time."

Mr. Ogden spent most of his life as a farmer in the Unionville area. Knitting has been strictly a sideline. He is turning over his present knitting output to the local Red Cross organization.

Until two years ago, Mr. Ogden was active in farm work and even now takes care of an acre plot with chickens and other small stock. His wife does the housework at the cosy home, and both are keenly interested in current affairs. Knitting is easy on the nerves, this male expert admits. But he says it hasn't lengthened his life. "Fresh air and lots of work did that."

Glamor Days Are Over

Famous Cow Goes Back To Old Home On Farm

The cow that jumped over the moon is back where she started from. Elsie, the prodigal daughter of Elm Hill Farm, has returned to the old dairy home with Beulah, her own fatted calf. It was at this Brookfield, Mass., farm that Elsie began her meteoric career eight years ago. From now on she is expected to do nothing more than rest on her laurels and sign autographs.

No cow ever won more laurels. No cow has ever been seen by so many people. No cow except Elsie ever rocketed from stardom at the World's Fair to the Klieg lights of Hollywood. In all past bovine history no cow was ever given the keys to 12 cities. To-day Elsie is living proof that in this country the doors of opportunity are still open, even to a simple heifer with nothing but her good looks to recommend her. There are some who think that Elsie is nothing but a press agent's build-up. But those who saw her at the Fair will not agree. It required a certain aplomb for her to chew her cud so proudly amid the trophies of her conquests. In this world of turmoil and frustration it is something indeed to remain America's No. 1 Contended Cow.—New York Times.

Now comes the sweet-toothed pig—a large pig-farmer in Youngstown, Australia, has contracted for the waste from a chocolate factory nearby for feeding his stock.

The Ukrainians have the highest percentage of voluntary enlistment of any race it is stated, that is in proportion to their number in Canada.

After administering first aid to a 76-year-old man fatally hurt in a motor accident in a Manchester blackout, a woman discovered the patient was her father.

LOOK OUT FOR YOUR LIVER

Buck Up Right Now and Feel Like a Million!

Your liver is the largest organ in your body and most important to your health. It purifies your blood, gets rid of poisons and new poisons, allows proper nourishment to reach your blood. When your liver gets out of repair food decomposes in your intestines. You become constipated, stomach and kidneys can't work properly. You feel "rotten" because your liver is not working right.

For over 25 years thousands have won prompt relief from these miseries—with Fruit-a-tives. So can you now. Try Fruit-a-tives—you'll be simply delighted how quickly you'll feel like a new person, happy and well again. 25¢, 50¢, 75¢, 100¢. Largest Selling Liver Tablets

Takes Care Of Increase

Canada Sets 20,000 Cases Of Eggs To United Kingdom

The agricultural department at Ottawa announced the sale in the past two weeks of 20,000 cases of eggs, 30 dozen to the case, to the United Kingdom.

Mild weather caused an increase in Canadian egg production and the department said the shipment to Great Britain would help take care of this increase.

A Useful Frog

The arrows of some South-American Indians are tipped with a poisonous substance from a species of frog. Other tribes use the same frog in drying parrots' feathers to increase their salability.

Before four zones of Standard Time were adopted in 1883, there were more than 50 kinds of time in the United States.

China shipped about \$500,000 worth of fire-crackers to the United States in 1938.

Airplane lubricants are being manufactured out of herring, cod-dine, and whale oils by the Japanese.

Bees are kept in an apairy, which comes from "apis," meaning bee.

A Real Contest

133 Cash Prizes Are Awarded Every Two Weeks

Did you ever figure out what chance you have on many contests where only a limited number of prizes are awarded?

Do your own thinking and then get in on the Royal Household Flour contest run by Ogilvie Flour Mills, which is advertised on another page in today's issue.

You'll note that there are 133 prizes every two weeks—one of \$100, one \$50, one \$25, ten of \$10 each, 20 of \$5 each, and one hundred prizes of \$2.50 each.

The large number of money prizes gives you a real chance of a win and it costs you nothing to enter.

And remember—all you need to enter is a label from Royal Household Flour—the favorite flour that you'll use anyhow! 133 prizes totaling \$625.00 every two weeks—get in and, take some of this money for yourself.

Free Hockey Book

Guide To The Major Leagues Will Be Sent Free

There's a splendid hockey guide to the Major League players with the personal record of every man and many pictures offered free, if you write Imperial Tobacco Sales Co., Canada, Ltd., Montreal, Que.

Just ask for the Sweet Caporal Major League Hockey Guide and this book of over 150 pages will be sent you—free. Mention the name of this paper when you write.

Airplane lubricants are being manufactured out of herring, cod-dine, and whale oils by the Japanese.

Says a writer on problems concerning animals in parks: "Why anyone should want to tease a lion is beyond understanding." Perhaps Premier Mussolini could explain the urge.

The first railroads used rails made of wood with a thin metal strip fastened on top.

DOES YOUR NOSE FILL UP, SPOIL SLEEP?

If your nose fills up, makes breathing difficult, spoils your appetite, gives you a headache, etc., use Vick's Vapo-Ro-Trol on each nostril. Vick's Vapo-Ro-Trol is a new nostril spray. It helps flush out nasal passages, clearing clogging mucus, relieving transient congestion, brings more comfort, makes breathing easier, invites sleep.

When a Cold Threatens, use Vick's Vapo-Ro-Trol. Helps to prevent colds developing.

VICKS VA-RO-NOL

Bad News For Japan

Report States Chinese Army Is Getting Stronger Every Year

A review of the Chinese-Japanese war in Red Star, the Russian army publication said the past year showed an "increased battle capacity of the Chinese army."

China, the article said, has 22,000,000 regulars and 1,000,000 irregular troops under arms, compared with 1,000,000 Japanese in China. It said that the Japanese were superior in technique, but that the Chinese had "inexhaustible human resources and vast spaces."

A "prolonged war is exhausting for the Japanese," Red Star said.

Says a writer on problems concerning animals in parks: "Why anyone should want to tease a lion is beyond understanding." Perhaps Premier Mussolini could explain the urge.

The first railroads used rails made of wood with a thin metal strip fastened on top.

YOU can be one of 133 cash prize winners TWICE every month! in the ROYAL HOUSEHOLD FLOUR CONTEST

133 PRIZES TWICE EVERY MONTH

Twice every month, for six months, the following prizes will be awarded to winners in this contest:

First Prize.....\$100.00 Cash
Second Prize.....50.00 Cash
Third Prize.....25.00 Cash
10 Prizes, each of.....10.00 Cash
20 Prizes, each of.....5.00 Cash
100 Prizes of.....2.50 Cash

HERE ARE THE RULES

1. Simply send the words "Royal Household" cut from the bottom of a bag (or a saucer) showing address, postmark, name and address to: Contest, Ogilvie Flour Mills Co., Limited, P.O. Box 6091, Montreal. Use the coupon below or snip off sheet of paper, as desired.

2. Twice each month, or earlier, if necessary, draw names of eligible for prizes. A letter will be sent to each of these contestants, giving details of the contest. The different prizes (133) will be awarded according to the opinion of the judges to this question. In the event of a tie, the judges will award the prize. The decision of the judges will be final.

3. Each month, contests close on the 15th or last day of the month, or last day of the month. Entries received after that time will be considered in the following month.

4. You may make as many entries as you wish—in any one half-month or in different months.

5. The judges will be three disinterested persons selected by the Ogilvie Flour Mills Co., Limited. No employee, or member of employee's family, of the Ogilvie Flour Mills Co., Limited or its advertising agency, is eligible for this contest.

LIFETIME SATISFACTION

No fancy words of praise can equal this simple, human and heartfelt statement of facts that prove a lifetime of satisfaction with Royal Household Flour—taken from a letter typical of what thousands of Canadian housewives say:

"I would like to tell you like a little girl I used to live in Ontario when I was a young girl and my mother used to bake, and again in Manitoba as a new bride, and I still use it now as an old woman with my family all with homes of their own—and, I might say, they use it also."

YOU WILL FIND IT BETTER, TOO

Raking is never a chore when you use Royal Household flour. Freshening housework is a cinch when you use Royal Household flour. Your clothes smell better, your house looks better, your food tastes better, your health is better. Royal Household flour is a joy to use. You deserve nothing less—so buy it and try it to day.

Report Plans For Aerial Highway Over Northwestern Canada

Ottawa—Plans for facilities to provide an aerial highway across northwestern Canada—a purely Canadian undertaking, but nevertheless linking the United States with Alaska by direct air route—are expected to be made public officially before long.

A report here, from well-informed sources, but which could not be officially confirmed, was that a new string of air bases will be built from Edmonton, already linked with the United States by air, across northern Alberta, northern British Columbia and the Yukon to Alaska.

Already the route is in use, but the planes that fly it are commercial machines equal to long hops and adapted to this particular type of northland flying.

One source indicated the new bases would have facilities to serve the largest numbers of either the Canadian or the United States air forces. This entails construction of large runways needed for take-off and landings.

The new route will be east and north of the Rocky Mountains through sparsely settled country that now bears only the drone of the few commercial planes that fly through the area.

The understanding here was that radio beams, already installed between Edmonton and the American border, would be placed along the complete route to Alaska. Numerous lakes would make the route especially feasible for seaplane travel in the summer. As the case at winter training fields operated under the British Commonwealth air training plan, the snow at the Alaskan route landing fields will be rolled and packed down hard during winter operations.

The existing commercial line in this area now operates two or three times a week from Edmonton, Grande Prairie, Alta., to Fort Nelson, B.C., and then to Whitehorse in the Yukon by way of Watson Lake and Tsielin. The connection with Pan-American Airways is made at Whitehorse and the Canadian line goes on to Dawson and Fairbanks.

Construction Contracts

Ottawa—Awarding of five construction contracts totalling \$383,000 was announced by the munitions and supply department. They include a \$15,000 contract for the heating system at the wireless training school in Calgary, going to Waterbury-Waterbury Mfg. Co., Ltd., Regina, for completion in February.

Taken Off Secret List

New Bomber Is Now Being Used By British Flyers

London.—The air ministry announced that its Botha twin-engined torpedo bomber is "off the full secret list of British warplanes."

That means that the plane can now be mentioned but that no details of its production or action against the Germans and Italians are yet permitted.

The ministry description of the plane was as follows:

"The Botha is a two-engined high-wing monoplane designed by Messrs Blackburn, the makers, as a general reconnaissance and torpedo bomber. It is powered by two Pegasus engines. Its span is 59 feet, length 50 feet 11½ inches and its height is 18 feet, three inches."

Trade Agreement

Russia To Aid Germany In War Effort By Selling Grain

Berlin.—The Nazi government announced Germany and Russia signed a series of treaties in Moscow including a new trade agreement designed to aid Germany's war effort and involving many billions of marks."

Other agreements recognized trade deals which Germany previously had signed with the Baltic states of Lithuania, Latvia and Estonia, which now are absorbed in the Soviet Union, and provided for the regulation of border and population resettlement procedures.

The German news agency boasted the trade agreement included the "greatest grain deal in history."

Sail For Britain

Enemy Internees Described As Of The Refugee Type

Ottawa—Almost all the 250 or 300 enemy internees who recently sailed from an east coast Canadian port for England are internees of the "grade C" or "refugee" type, interne officials said.

The big majority of the group were men released from internment camps on recommendation of the British home office to volunteer for service in the British auxiliary military pioneer corps which does salvage work after air raids.

Others were going back to resume their normal occupations in the United Kingdom, following decision they were not a menace to the state.

To Exercise More Control Over Contract For The Bren Gun

Ottawa—New contracts were substituted for the original Bren gun manufacturing contracts with John Inglis Co. of Toronto, so the government would be able to "exercise a more intimate control over production" in view of its "predominant financial interest" in the company's operations, acting Supply Minister Macdonald said.

"The new contracts between the crown and John Inglis Co. provide that the company will operate the armament part of the plant for the government on a management fee basis," Mr. Macdonald said in a 45-word statement.

"The terms of this contract apply equally to its output before the date of the contract and to its future output."

"The commercial part of the company's plant (that is, the part not engaged in the production of armaments) is not affected in any way by the contracts and remains under the ownership and exclusive control of the company."

Mr. Macdonald's statement said:

"The government has not taken over the John Inglis Co., Ltd., nor has it taken over the plant of this company."

The original contracts with the John Inglis Co. for manufacture of light Bren guns were subject of bitter political controversy and a royal commission investigation in 1938 and 1939.

Government officials said the new contracts had been in existence since Oct. 31, 1940.

U.S. Defence Budget

Calls For Expenditure Of More Than \$554 A Second

Washington.—The United States "total defence" budget calls for the expenditure of a little more than \$554 a second, throughout the new fiscal year—day and night, Sundays and holidays.

To meet this outgo, approximately \$262 would be collected in taxes each second, and an additional \$292 raised by borrowing.

The 31,536,000 seconds of the "total defence" fiscal year start ticking off July 1, 1941.

President Roosevelt asked Congress for \$17,485,528,049 in an unprecedented peacetime budget reflecting "a world at war" and the huge cost of preparing "for total defence."

Mr. Roosevelt allotted \$10,811,314,600 of his 1942 budget exclusively to national defence, estimated the deficit for the year beginning July 1 at \$9,210,093,049, and foretold a public debt pushed by that deficit to a record \$55,367,065,056 by June 30, 1942.

The budget made no provisions for the cost of aid to Britain, Greece and China—an extensive program to be covered in subsequent appropriations request. Congressional leaders said that the overall cost of this alone might eventually total \$10,000,000,000, but were uncertain on how great the actual cash outlay would have to be for the first year.

Irrespective of these future aid requests, nothing in treasury history compared with the huge figures presented to the senate house since the last year of the Great War when spending reached \$18,522,895,000 and the deficit \$13,370,683,000.

Founded Boy Scouts

Lord Baden-Powell Dies At His Home In Kenya Colony

Nairobi, Kenya Colony.—Lord Baden-Powell, 83, veteran soldier who spent the last 30 years of his life working for peace as the founder of the Boy Scout movement, died at his home in Nairobi, Kenya Colony. He had been in precarious health since last November when he suffered a series of severe heart attacks.

Baden-Powell, a veteran soldier and a retired lieutenant-general, served with the British armed forces in Africa during the Boer war and participated in the famous defence of Mafeking.

In 1937, before his departure for Africa, Lord Baden-Powell won on the coronation honors list, receiving the order of merit from newly-crowned King George VI.

Lord Baden-Powell founded the Boy Scouts in 1910, following his retirement from the British army, to "promote good citizenship in the rising generation" and to further peace through the advancement of international understanding.

Project Will Be Costly

Australia Plans To Form And Train Armored Division

Sydney, Australia.—The Australian war cabinet decided to begin immediately the formation and training of an armored division of the Australian Imperial Force, to be made up of two armored brigades and armored divisional troops.

Tanks and most other armored vehicles will be made in Australia. The project will cost several million pounds.

GENERAL SMUTS INSPECTS ENGINEERS

The commander-in-chief of the South African Forces, General J. C. Smuts, recently watched a demonstration at an engineers' camp in the Transvaal. He saw the rapid launching of a small box girder bridge and inspected the largest mechanical transport suspension bridge ever built by the South African Engineering Corps while in training. This photograph shows (left to right), the prime minister, Gen. J. C. Smuts, Capt. E. T. Dobson, O.C. of the Engineers' camp, and Lieut.-Gen. Sir Pierre van Ryneveld, chief of general staff.

Holds Important Office

Mr. Ronald H. Cross, the British Minister of Shipping.

Predicted That This Year Will Be The Turning Point Of War

London.—Ambassadors of several foreign nations have sent reports to their governments predicting developments which would be calculated to make 1941 the turning point of the war, it was learned.

Foremost among the prophecies are:

That in 1941 Germany will make a desperate attempt to knock out Great Britain.

That Britain stands a fair chance of forcing Italy to sue for peace this year.

That Japan is likely to take a drive for South Seas expansion to synchronize with a tremendous German spring offensive.

The prediction that Germany will make its supreme offensive effort this year is based on the belief that otherwise from 1942 onward Germany would lose ground.

The realization regarding Britain's chance to crush Italy is made with the realization that Germany would be prepared to assume full control in Italy.

Reliable informants say some influential members of the government share the views of the ambassadors.

Well informed quarters here believe it highly probable that Hitler's spring will start an aerial attack on Britain which will make previous attacks appear negligible. At least three leading ambassadors claim information that, while Britain is now accustomed to raids by several hundred German planes in the spring several thousand will be flung against it simultaneously.

Several embassies forecast that Hitler's spring offensive will introduce gas warfare.

Most embassies agree that Hitler should not supply one-third, or 170,000,000 bushels annually of the European feed import trade, with a superior feed product. It would mean to our western farmer an additional income of \$70,000,000 to \$90,000,000 annually.

The plant breeder claimed western Canada could produce superior quality feed grain just as it produced the world's best wheat. The European feeder was a shrewd customer. He realized that corn, the main feed import, was low in protein content and was therefore not satisfactory as a concentrated feed. Protein content was the most important single factor in high quality feeds, and would become more important as scientific feeding methods progressed.

Employment Figures

Ottawa.—Employment in Canada at Dec. 1, 1940, showed little change from Nov. 1, 1940, the Dominion bureau of statistics reported. But with 1,364,348 employees on the staffs of 12,444 reporting establishments, the seasonally adjusted index was the highest for any Dec. 1 in the past 20 years.

Britain's Unemployed

London.—The labor ministry announced total of Britain's unemployed was 765,279 on Dec. 1940—lowest since the keeping of records began in 1921. The December figure was a decrease of about 86,000 from that of November.

London.—Prime Minister Churchill received the unprecedent honor of told a luncheon of The Pilgrims here, being called for a third time to lead the American democracies.

His Majesty's government had placed in Washington an ambassador, Lord Lothian, who character and qualities gained him the trust and friendship of President Roosevelt. Suddenly, unexpectedly, Lothian was struck down by death.

A line was broken, a gap was opened, and a loss of the highest consequence was sustained at a very grave moment for the British and American peoples. ***

We, therefore, thought it our duty to restore this link, to fill the gap, to repair that loss by sending, without regard to derangement of our forces and circles here, the best man we could find, without regard to any other consideration whatsoever.

We chose a foreign secretary, who had himself chosen Lord Lothian to fill Lord Lothian's place. Our choice was most agreeable to the president and it commands the full confidence of nearly all those in this country who mean to persevere in our righteous cause until its certain victorious end is reached.

In Edward Halifax we have a man of light and learning, whose company is a treat and whose friendship it is an honor to enjoy. I have often disagreed with him in the 20 years I have known him but I have always respected him and his actions because I know that courage and fidelity are the essence of his being and that whether, as a soldier with his regiment in the last war or as the ruler of four hundred million in India, he has never swerved from the path of duty as he saw it shining out before him. ***

We send the United States an envoy who comes from the very centre of our counsels and knows all our secrets. Although, while Lord Halifax is serving as an ambassador out of this country, he cannot be a member of the war cabinet, he will be, if I may borrow a military term not inappropriate to the times in which we live, as it were seconded from it.

He still attends all our meetings and will continue to do so during the weeks before his departure. ***

We now bid him and his brilliant and devoted wife, Godspeed and all good fortune.

It was a former Lord Chancellor of England who said: "All great powers must begin disarmament or starvation."

ADVERTISED GOODS

People know more about advertised goods than about those that are not advertised. If you ask what is a good thing to buy for some need, people will usually quote some widely advertised article that everyone has heard of. If you ask about some competing article that is not advertised, they will usually say they never heard of it, consequently they are not likely to buy it.

People not merely buy the advertised goods they have heard of, but they are more likely to buy at the stores that are well advertised. These concerns appear constantly before the public eye by their widely read notices. A concern gets a big advantage over its competitors by the relatively small expense of advertising.

NOTES AND COMMENTS

NEXT to the war, the most vital matter before Canada today is the meeting of provincial premiers in the Dominion capital to thresh out the recommendations of the Rowell-Sirois report. Much propaganda has been spread by those for and against, and public opinion has been to a great extent influenced by political leaders, particularly the premiers of British Columbia, Alberta and Ontario. Premier Bracken of Manitoba comes out strongly in favor of the recommendations, because he believes Canadian unity and the western provinces will benefit. The report is based on the findings of the Rowell-Sirois commission, which over a period of two-and-a-half years investigated conditions in all Canadian provinces and heard evidence and statements from all who wanted to place their views before the commission. It will be remembered that the Alberta government would not cooperate and did not have any representatives appear before the commission when it sat in Alberta. Edmonton Chamber of Commerce spent considerable money in submitting evidence for the province, otherwise the commission would have learned very little to include in its report of Alberta.

MANY conflicting views will be aired at the conference, and from the welter of opinions the individual will have an opportunity to become better informed on the whole subject. Unfortunately subjects that require close study and a lot of reading are too often passed up by the masses, who find it so easy to base their opinions, really, from opinions colored to suit political motives. The outcome of this conference will affect the whole of Canada, and though it has been urged in some quarters that it will not lessen the financial burden on Alberta, figures prove the contrary. It is true it will take some taxing out of the hands of provincial governments, and if there is one medium of taxation that should be taken out of provincial hands, it is the income tax, for with a duplication of collections as now existing, it is costing far more than if the Federal government alone collected it. Too many are already employed in government jobs and for every job created for party supporters there is added expense to long-suffering ratepayers. Alberta people from their experience since 1935 know this to be true.

THE latest amusing explanation of the deficit on Treasury branches operations, over \$300,000 for the year, is that the fifth wheel in banking instituted by Alberta's government should be viewed as education. Education in what? That it takes money to operate banks,

War Savings Pledge Month

and that when they cannot operate profitably, a kind government will pay the losses! This is the type of education that treasury branches have provided, according to the words of Provincial Treasurer Low.

If a business house at the end of a year found itself in the same disastrous predicament, it would conclude it was time to declare itself bankrupt, if the sheriff had not already stepped in.

Legion Buys Lot

East of Club Rooms

Officials of the local branch of the Canadian Legion have purchased the lot east of the club rooms. The property was bought off Sartoris Lumber company and Harry Gee is now employed demolishing the building on the lot.

One official has stated that the ground will be used during the summer months as a horseshoe pitch and enough money will be available to build a modern building. It is the intention of officials to build quarters on this lot to replace the present refreshment room. The old refreshment room will then be made into a lounge for the use of members.

CHEVROLET

GENERAL MOTORS' NO. 1 CAR

Again Takes First Place In Motor Car Sales

IN EVERY PROVINCE OF THE DOMINION

YOU have awarded Chevrolet—General Motors' No. 1 Car—the coveted honor of being No. 1 car in popular demand in 1940.

For years you Canadian motorists have purchased more Chevrolets than any other make of automobile, regardless of type, size or price. You did it again in the year just closed—most emphatically, in every province in Canada.

We want to thank you for your mark of high favor and for your confidence. You place on us a definite responsibility to continue to give motor car leadership—and we accept that responsibility. Since you rate Chevrolet first in value, we are under the obligation to keep it first in value.

We consider that there is an entirely new call this year upon Chevrolet quality and dependability because Chevrolet is an essential part of Canada's war effort. To fill its place in the transportation program of a nation at work to win the war, Chevrolet must be built to an effective and enduring standard.

These are the reasons why we have redoubled our efforts to widen and increase Chevrolet value leadership in our new cars for '41. If you will examine the

new Chevrolet carefully, you will agree we have succeeded. You will find, for example, that Chevrolet alone among the low-priced cars includes as standard equipment certain quality features which a buyer would be wise, under present circumstances, to insist upon. You will find that Chevrolet with its thrilling new *bigness is styled ahead* for your protection.

It is worth money to you to know that Chevrolet is the only low-priced car providing, at no extra cost, original Vacuum-Power Shift which makes gear-shifting 80% automatic and requires only 20% driver effort; genuine Unitized Knee-Action which absorbs road shocks and prevents pitching and tossing; a body by Fisher of the same design and quality featured on higher-priced cars; and Concealed Safety Steps which prevent the accumulation of ice and snow and are the mark of truly advanced styling.

We invite you to take full advantage of the value you have helped, by your buying preference, to create.

Won't you please visit our showrooms and thoroughly inspect General Motors' No. 1 car—and Canada's No. 1 car—today!

FRED EMERY, Manager

YOUR INCOME TAX

HOW? WHEN? WHERE? WHO? HOW MUCH?

THIS YEAR, almost every man and woman in Canada will share the burden of paying for the war effort. You need not be afraid. Who never paid before. A personal budget payment plan is available to old taxpayers who are faced with substantially increased income taxes.

Canadians are asked to shoulder their share of the war effort cheerfully and willingly. By paying your income tax regularly you help to extend the production of war material and bring the day of victory closer. Figure out how much tax you will have to pay, and arrange to pay promptly when due.

Pay by installments—the easy way—and save interest.

Cut out this page and keep it for future reference.

**WHO PAYS INCOME TAX?**

If you are a single person without dependents and your income in 1940 was more than \$750.00 you pay general-income-tax. If you are a married person without dependents, and your income in 1940 was more than \$1500.00 you pay general-income-tax.

If you are a married person with children, you are allowed a \$400.00 exemption for each dependent child or grandchild, in addition to the \$1500.00 exemption.

NOTE: In addition to the general-income-tax you pay National Defence Tax on your total income without any exemption if you are single and your income is over \$600.00 or if you are married and your income goes over \$1,200.

HOW DO YOU PAY?

Your income tax may be paid in the following ways,—

1. The Present Method: At least one-third of the tax to be paid by April 30th, the balance, with interest, to be paid in four monthly instalments to be paid by August 31st. On any balance unpaid after August 31st, the interest rate will be 8%.

2. The Proposed Method: In 8 monthly instalments without interest. To take advantage of this new way of paying the instalments must be paid on or before January 31st. You must pay at least one-third of the estimated tax in four equal monthly instalments by January 31st, February, March and April, i.e. 1/8 of the estimated tax in each of the said 4 months. The remaining two-thirds must be paid in four equal monthly instalments in May, June, July and August, i.e. 1/8th of the estimated tax in each of the said 4 months. (This will be in the amended law.)

3. The Recommended Method: This method will not be found in

the law but it is a simple method, namely, in eight equal monthly instalments, without interest, commencing in January.

To take advantage of the monthly payment without interest each payment must be made on or before the due date. Otherwise interest will be charged on the total balance remaining unpaid after April 30th.

Instalment payments are therefore as follows:

On or Before Jan. 31	On or Before Feb. 28	On or Before Mar. 31	On or Before April 30
\$5	\$5	\$5	\$5
On or Before May 31	On or Before June 30	On or Before July 31	On or Before Aug. 31
\$10	\$10	\$10	\$10

However, it is recommended that you pay your tax in eight equal monthly instalments of \$7.50 each—\$60.00.

Instalment Income Tax Remittance Forms are available at any post office, or any branch of any bank, or the office of the Inspector for your

Rates of General-Income-Tax which Individuals Must Pay

Your net taxable income is the amount left after you deduct exemptions from your total income.

If your net taxable income is \$250 or less the tax is 6% thereof.

If between \$250 and \$1000 the tax is \$15 plus	8% on the excess over \$1500
1000 and 2000 " 75 " 12% " "	1000
2000 and 3000 " 150 " 16% " "	2000
3000 and 4000 " 350 " 20% " "	3000
4000 and 5000 " 550 " 24% " "	4000
5000 and 6000 " 750 " 27% " "	5000
6000 and 7000 " 1050 " 30% " "	6000
7000 and 8000 " 1350 " 33% " "	7000
8000 and 9000 " 1650 " 36% " "	8000
9000 and 10000 " 2045 " 37% " "	9000

For higher incomes refer to the Income War Tax Act.

In addition to the above rates, there is a surtax on all investment income in excess of \$5000.

Also there is National Defence Tax and in some Provinces, Provincial Income Tax.

IMPORTANT TO EVERY INCOME TAX PAYER**To enjoy the advantages of the Interest-Free Instalment Plan**

You must pay the first instalment not later than January 31st, and pay regularly thereafter

**HOW MUCH DO YOU PAY?**

The general-income-tax is payable on your net income less exemptions. For a single, your exemption is \$750.00. Thus if your total income is \$1,000.00 you must pay tax on \$250.00.

The exemption for a married person is \$1,500.00 plus \$400.00 for each dependent child or grandchild. If you are a married man with two children, and a total income of \$2,600.00, your total exemption is \$1,500.00 plus \$400.00 for each child, or \$2,300.00 in all. So you pay tax on \$300.00.

Payment: You may send a cheque, Post Office or Money Order in payment of income tax by mail to the Inspector of Income Tax for the District in which you reside, or to the Receiver General of Canada. Write plainly, and give your name in full, so that mistakes in crediting may be avoided. Do not send money or postage stamps in envelopes.

RATES OF NATIONAL DEFENCE TAX

For a single person

2% on the total income if the income exceeds \$600 and does not exceed \$1,200.

3% on the total income if the income exceeds \$1,200.

For a married person

2% on the total income if the income exceeds \$1,200 with a tax credit of \$800 for each dependent child or grandchild.

For 1940 the tax is on one-half of the income and the tax credit is \$400.

FURTHER INFORMATION

including the National Defence Tax Booklet and the necessary forms may be obtained from the Inspector of Income Tax for the district in which you reside.

Forms are also available. Form T-1 Special is to be used by individuals who are not in business whose income is not more than \$5000. All others must use the regular form T-1 or in the case of farmers, Form T-1A. Form T-1 is to be used in addition to the Form T-1 Return, an Excess Profits Tax Return on Form E.P.T.1 or before April 30th next.

DOMINION OF CANADA INCOME TAX DIVISION

DEPARTMENT OF NATIONAL REVENUE

C. FRASER ELLIOTT,
Commissioner of Income Tax

WORLD HAPPENINGS BRIEFLY TOLD

Miss Agnes Clara McGee, 83, youngest daughter of Thos D'Arcy McGee, one of the fathers of confederation, died in Montreal.

Total production from all Alberta's oil wells is almost half a million barrels over 1939 production, and value of sales show an increase of more than \$6 million dollars.

Dr. T. H. Hogg, chairman of the Ontario hydro electric power commission, said that the commission is considering a new \$40,000,000 power plant at Niagara.

Oysters will be shipped from Vancouver to Ottawa to meet a shortage apparently caused by the recent embargo placed by the Dominion government on oysters from the United States.

Dr. Donald V. Trueblood announced that Seattle doctors had contributed and collected 3,500 pounds of medical and surgical supplies and shipped them to the British Medical Association.

Binoculars worth \$29,040 have been sent to Britain for the use of rooftop bomber spotters and other home defence purposes, the American committee for defence of British homes announced.

Canada's first copra plant will be in production next April, Sir Walter Carpenter, of Australia, said in an interview at Vancouver, and will be able to produce the 40,000,000 pounds of cocoanut oil now consumed annually in the Dominion.

As a result of negotiations with British authorities, the Canadian post office department has been successful in arranging a postal rate of 12 cents a pound on parcels addressed to His Majesty's forces in the middle east, Postmaster-General Mulock announced.

Quality Is Important

Canada Must Attain Higher Percentage Of Grade A Hogs

Every step which can be taken to improve the quality of bacon hogs in Canada will be of immediate benefit to the producers and of lasting benefit to the industry as a whole, according to officials of the Dominion department of agriculture.

The urgent necessity for improved quality is indicated in a study of 1940 gradings. Little more than a quarter of all hogs marketed in Canada in 1940 was eligible for A grade. Marketing officials points out that a much higher percentage of A grade hogs is needed to keep up the quality of Wiltshire sides for export to the United Kingdom. This outlet for Canadian bacon and ham is of the utmost importance to Canada as well as to Great Britain. The future of the export side of the Canadian bacon hog industry depends upon the quality of the Wiltshires now being shipped to Great Britain. Financially, the exports cannot be better than the hogs marketed in Canada.

Carries Little Weight

Lindbergh's mother-in-law recently signed a petition to President Roosevelt urging that the United States show greater energy in the support of Britain—she and 163 other prominent Americans. If Lindbergh's zeal for his German friends doesn't convince even his own relatives, its effects on the population generally are likely to be incon siderable.

Ten thousand tons of wool to make 9,000 miles of serge will be required in the British Ministry of Supply's latest mass order for more than 5,000,000 suits of battle dress.

MICKIE SAYS—

"WHEN HIS STOVE GREW OLD, A MERCHANT SAID, 'NO MORE COAL FOR YOUR STOVE, UNTIL YOU GIVE OUT LOTS OF HEAT!' AND SO HE FROZE! DID YA EVER TELL A NEWSPAPER GUY THAT YOU WEREN'T GOIN' TO ADVERTISE 'TILL BUSINESS GOT GOOD?'

New Device A Success

Ground Crew Get Exact Positions Of Planes In Flight

Development of a device enabling ground crews to determine exact positions of airplanes in flight was announced by United Air Lines, Chicago.

J. R. Cunningham, the line's director of communications, said that for the first time it would be possible for an airline dispatcher to be informed of the course of planes in flight at all times and to be aware instantly of any deviation from the true course.

This can be accomplished, he said, without the air of computations by the airplane's pilots and even without their knowledge.

The device consists of a large metallic frame antenna set atop a building and rotated by an electric motor. Each time the airliner transmits by shortwave radio, the antenna picks up the signal.

Equipment linked with the antenna by a telephone line automatically indicates the plane's bearing on a chart in triangulating plane's position so as to inform pilots of their exact location.

Stations A, B and C can take bearings simultaneously. Lines from the stations are projected on a map and the point where they intersect will show where the airplane is flying.

Cunningham said the recorder, product of four years of research by the lines' communications laboratory in Chicago, was regarded as one of the most revolutionary projects in the history of scheduled flying.

Oliver branched out to public parks and cemeteries, eventually to \$10,000 a year for church services. Hollywood, whether his fame had traveled. The worn wizard moved to California, set up a ten-acre experimental farm in Los Angeles County. It was guarded by tall board fence, topped with barbed wire. When he got to town, in 1939, Oliver at last told his secret, for the benefit of hard-pressed farmers. By that time he had rolled up a tidy fortune.

He is still a big worm operator. Earthworms are hemaphrodites; all bodies are male except for Oliver and Oliver gather them by the millions, from layers of damp humus in his culture beds. Packed in damp peat moss, they can be shipped any distance. Thirty days after being unpacked and put in the soil, the eggs hatch. In 90 days later they become adult laying eggs of their own. Earthworms make a wonderfully nourishing and relatively cheap food for poultry, hatchery fish, market frogs, trout, terrapin. Everybody knows that they like terrapin. Dr. Oliver developed what he calls an "intensive range" poultry diet—sprouted grain mixed with worms and worm eggs capsules. Fed on this at a cost of one-tenth of a cent a day, pullets start laying. A hen's eggs before she is five months old. Wizard Oliver is a good example of the fertilizer, and a liquid nutrient (for flower growers) which is made by letting water drip through worm casts in boxes.

Oliver is the only man who has successfully cultivated any of the 1,100 species of earthworms. He feeds frogs, frogs, etc., he promoted a meaty hybrid ten inches long. Another hybrid, short and thick, yields a colorless, odorless, volatile oil used in medicine. A medium-sized hybrid, very tender and vigorous, can be easily colonized, sold when populations have been killed off by strong fertilizers or poison sprays. Oliver calls it his "solution worm."

In California and elsewhere there are several hundred farmers who have planted great batches of eggs, raising them in their gardens. Some years back, practically all of those farmers were staggering on the brink of bankruptcy. To-day, says Chronicler Hogg, every one, without exception, is making healthy profits.

Send 15 cents in coins for your copy of "Self-Instruction in Short-hand" to Home Service Dept., Winnipeg, Newspaper Union, 175 McDermot Ave., Winnipeg, Man.

The following booklets are also available at 15 cents each:

- 191—"How To Make Your Own Rugs"
- FB—"Four Designs to Paint on Glass—Second Series"
- 181—"Club Ideas—A Guide"
- 161—"New Ideas in Making Curtains and Drapes"
- 141—"Self-Instruction in Skiing and Other Winter-Sports"
- 118—"Good Table Manners"

British Press Paraded

The Swiss paper Basler National Zeitung, publishes the following tribute to the British Press: "The attitude of the British Press is most remarkable, showing no signs of whining, rage, or vengeance. This attitude is most admirable considering the onslaught on London."

Just The Opposite

At maturity, bunches of bananas hang from the tree with the individual "fingers" pointing upward, which is just the opposite of the way they usually are displayed in stores.

Praise For The Earthworm

Scientist Discovers That They Are A Valuable Aid In Growing Crops

In 1881 Charles Darwin wrote: "Without the work of this humble creature, who knows nothing of the benefit he confers upon mankind, agriculture, as we know it, would be very difficult, if not wholly impossible." The great evolutionist was referring to the lowly earthworm.

In 1906 a young Texas physician and surgeon named George Shefford Oliver read Darwin's book on earthworms. A descendant of the James Oliver who invented the steel plow, George Oliver was living on a five-acre plot, and he decided to try earthworm culture on his grounds.

Soon earthworms were such a big part of his life that he gave up his medical practice for them. To-day Dr. Oliver is the author of a three-volume treatise on earthworms, a subject on which he is acknowledged by many to be the world's No. 1 authority. His story was told in Nature Magazine by John Edwin Horner.

Constantly and voraciously, earthworms eat earth, dead leaves, decaying organic matter of all sorts. The waste material they throw off as worm casts is one of the richest of all plant foods. Moreover, worm tunnels in the soil, helping the oxygen and nitrogen metabolism of plants. And the tunnels in the watering tubes, facilitate rainfall storage. Darwin estimated that a healthy English acre ought to have about 2,500,000 worms, turning out 18 tons of casts a year.

Dr. Oliver still propagates earthworms in culture beds, colonizing his grounds. His trees and flowers grew more beautiful, his garden produce bigger and tastier. His strawberries were fat crimson marvels. Neighbors asked him not to tell the secret, but he did, telling people to begin paying him money to beautify their estates, putting up their gardens. They cared not how he did it; they were delighted with the results.

Oliver branched out to public parks and cemeteries, eventually to \$10,000 a year for church services. Hollywood, whether his fame had traveled. The worn wizard moved to California, set up a ten-acre experimental farm in Los Angeles County. It was guarded by tall board fence, topped with barbed wire. When he got to town, in 1939, Oliver at last told his secret, for the benefit of hard-pressed farmers. By that time he had rolled up a tidy fortune.

He is still a big worm operator. Earthworms are hermaphrodites; all bodies are male except for Oliver and Oliver gather them by the millions, from layers of damp humus in his culture beds. Packed in damp peat moss, they can be shipped any distance. Thirty days after being unpacked and put in the soil, the eggs hatch. In 90 days later they become adult laying eggs of their own. Earthworms make a wonderfully nourishing and relatively cheap food for poultry, hatchery fish, market frogs, trout, terrapin. Everybody knows that they like terrapin. Dr. Oliver developed what he calls an "intensive range" poultry diet—sprouted grain mixed with worms and worm eggs capsules. Fed on this at a cost of one-tenth of a cent a day, pullets start laying. A hen's eggs before she is five months old. Wizard Oliver is a good example of the fertilizer, and a liquid nutrient (for flower growers) which is made by letting water drip through worm casts in boxes.

Oliver is the only man who has successfully cultivated any of the 1,100 species of earthworms. He feeds frogs, frogs, etc., he promoted a meaty hybrid ten inches long. Another hybrid, short and thick, yields a colorless, odorless, volatile oil used in medicine. A medium-sized hybrid, very tender and vigorous, can be easily colonized, sold when populations have been killed off by strong fertilizers or poison sprays. Oliver calls it his "solution worm."

In California and elsewhere there are several hundred farmers who have planted great batches of eggs, raising them in their gardens. Some years back, practically all of those farmers were staggering on the brink of bankruptcy. To-day, says Chronicler Hogg, every one, without exception, is making healthy profits.

Very Different Now

Aviation Has Changed Greatly In The Last Few Years

The Fort William Times Journal says: There is an immense contrast between the aviation of only a few years ago and that of to-day. When Atcock and Brown flew the Atlantic the trip was a gamble with death, and the flight of Charles Lindbergh sent the people of the United States wild. As a matter of commonplace news, we are told to day that bombers are being flown regularly across from ports on this side of the ocean to Great Britain and nothing is thought of it. The crossing is made in less than ten hours, or considerably less time than it took to go by train from Fort William to Winnipeg.

Fully Mechanized

The whole of the Australian Imperial Force that left the Commonwealth for the war areas was mechanized—not a horse went with it, said Army Minister McBride in reporting on Australian operations.

A SLENDERIZING SHIRT-WAISTER

By Anne Adams

No modern matron would be without at least one trim shirtwaister!

This Anne Adams frock, Pattern 4578, is expertly designed to make you look trim and slim. The bodice has a spindly bodice roominess, with a back-to-front yoke to keep the shoulders trim and darts just below the front yoke to hold right over the bustine. This Anne Adams frock, Pattern 4578, is expertly designed to make you look trim and slim. The bodice has a spindly bodice roominess, with a back-to-front yoke to keep the shoulders trim and darts just below the front yoke to hold right over the bustine. This Anne Adams frock, Pattern 4578, is expertly designed to make you look trim and slim. The bodice has a spindly bodice roominess, with a back-to-front yoke to keep the shoulders trim and darts just below the front yoke to hold right over the bustine. CHAPTER II.

Before Nancy could ask another question, the driver of the truck was out of his cab and had come over to their car. Mr. Bristow rolled down the window and leaned forward to talk to him.

"Say, Mr. Bristow, I'm terribly sorry about this," the driver began. His employer interrupted him. "Nothing to be sorry about. You did a nice job getting out of the way. Congratulations."

"Thanks." The driver, a tall, sunburnt youth, reddened a little. "If I'd seen him coming there wouldn't have been no danger. He came at me so quick, though, I didn't have a chance."

"They're skilful, all right," Mr. Bristow said irritably. "How the devil, though, do they know when these shipments are going out?"

The truck driver took off his cap and scratched the back of his head furiously. "Search me. But they do."

"Well, you might as well go on," his employer said wearily. "The chances are they won't try it again this time."

The young man grinned. "If they do, I'll dodge 'em again."

He turned around and started back to his truck. Before he had gone more than a few steps, Mr. Bristow called him back.

"Just a minute!" He paused for an instant, and went on. "Some day you may not dodge quickly enough. I understand you have a wife and a new baby. Want to be taken off this run? If you say the word, I'll—"

The driver interrupted him hastily. His blue eyes seemed to have changed color, to have turned a steely grey. "No thanks, Mr. Bristow. I'd rather stick with it. I'll take my chances of not getting out of the way."

John Bristow smiled for the first time in several minutes. "Okay, Bill, suit yourself. Good luck."

As the truck driver walked back across the street, the white-haired man called to the chauffeur to drive on, and leaned back heavily against the cushions.

Nancy Thorne had found her voice at last. "What's it all about? Please—tell me. Was that a—a that man deliberately trying to wreck the truck?"

Her companion sat staring out the window at the seemingly endless succession of dingy brick buildings that flashed by. His face was set in hard, grim lines.

"Yes, my dear, it was a deliberate—and very skilful—attempt to wreck that truck. It wasn't the first, and I have no hope it will be the last."

"Oh!" It was a long, indrawn gasp. She started to ask another question, but Bristow interrupted her.

"Only two attempts, so far, have been successful. In one, the contents of the van were damaged. In the other, they were *'a'*! but completely destroyed. The driver of the truck—the second one—was killed."

ITCH STOPPED
*in 15 min.
-or Money Back*

For quick relief from itching of acne, pimples, blisters, heat, stings, scabies, rashes and other dermatological complaints. Liquid D. D. D. Prescription. Glycerine, camphor, Salicylic acid. Soothes irritation and quickly stops intense itching. Use before the itch begins. Your druggist orders for D.D.D.PRESCRIPTION.

There was a silence. "But why?" Nancy said suddenly, "Why?"

John Bristow sighed, and laid a hand over hers. "Have you ever heard of sabotage, child?" He was silent a moment, and went on, "The contents of that truck are vital in making airplane motors to fill army contracts. Their loss might mean a delay of weeks—months—in filling those contracts." As he went on, he seemed almost to be talking to himself. "The financial loss involved is not important—is nothing, but that delay—." He drew a long breath. "Somehow the time when each important shipment is to be made is discovered. I thought we'd stopped every possible leak, but evidently—"

He seemed suddenly to remember something.

"Nancy, dear, keep this in mind. Out at the plant—there you will find a job left vacant by a girl who was just fired. Maybe there will be a little feeling—that well, that she was let go in order to make a place for you. That is because, when she was discharged, the circumstances were such that—we could not make any explanation."

"I don't quite understand," she said, her brow wrinkled a little.

"Well, never mind. You don't need to understand. Only that the girl's name was Hill, Luella Hill—was not fired in order to make a job for you, but for other reasons."

His tone seemed to imply that she should not ask any more questions, and she remained silent, thinking it over. She was a little sickened and angry by it all.

"Uncle John—"

His face brightened suddenly. "You haven't called me that since you were a youngster! What is it, my child?"

"Isn't there some way to stop them—some way to find out who they are?"

"Yes, of course there are, my dear. Men are working right now—." He broke off suddenly and then said, "But there hasn't been much success so far."

Nancy Thorne started to speak, and stopped herself. A mad resolve was forming in her mind. She felt sure that John Bristow would laugh at her, that perhaps even Pat would. There was a chance, though, that she might succeed.

She began to feel a little happier about the prospective job in the factory offices of the Bristow Casting Company.

"We're almost there," John Bristow told her. "Sure now, you don't want to change your mind?"

"Not me." What was it the truck driver had said? It's rather stuck in it."

She took out her compact and studied herself curiously as she dusted new powder on her short, straight nose. Somehow she'd had a feeling was forming in her mind. She felt sure that John Bristow would laugh at her, that perhaps even Pat would. There was a chance, though, that she might succeed.

She began to feel a little happier about the prospective job in the factory offices of the Bristow Casting Company.

"We're almost there," John Bristow told her. "Sure now, you don't want to change your mind?"

"Not me." What was it the truck driver had said? It's rather stuck in it."

She took out her compact and studied herself curiously as she dusted new powder on her short, straight nose. Somehow she'd had a feeling was forming in her mind. She felt sure that John Bristow would laugh at her, that perhaps even Pat would. There was a chance, though, that she might succeed.

The car swung off to the right through a pair of metal gates, and slowed to a stop in a little yard. Nancy got out of the car and stood staring about her curiously.

She saw a long, wide, two-story building of red-brown brick, darkened here and there by smoke, with what seemed to be hundreds of windows. Near the car a narrow walk led up to a door marked "Employees Only."

John Bristow led her up a flight of steel and cement stairs to the second floor, and through a glass door marked "Offices" into a big room filled with desks, men and girls, filing cases, and the clutter of typewriters. Nancy stared about her as they passed through the room. This was where she would spend her days from now on. It seemed to her that the clatter of typewriters thinned a little, and she became uncomfortably conscious of the curious scrutiny of many eyes before they had walked the length of the room and entered another office that faced the front of the building.

The man who rose to greet them from behind a big, flat-topped desk was tall and very thin. It seemed to Nancy that he was gray all over, not only his suit, but his limp, thinning hair, his slightly protuberant eyes behind heavy glasses, even his skin was a faint, unhealthy gray. His face was deeply lined, and there

was a peevish, complaining twist to the corners of his mouth.

"Oh, yes, the girl to take Miss Hill's place," Grimsahaw said, looking Nancy over curiously. "What's your name, miss?"

"Nancy—Ellis." She remembered the new last name just in time, with an uncomfortable feeling that she was blushing.

The thin man noted it down on a slip of paper and began firing questions at her. "Typing? Shorthand? Filing? Dictaphone? Experience?"

She answered as best she could.

She had taken a business course in college, to the great amusement of her father and brother. But ex-

perience—well—.

John Bristow answered for her.

"Oh, she'll do all right as soon as she gets on to things."

"Of course," the office manager answered. His smile was even more unpleasant than his frown. He pushed a button on his desk, and in a moment the door opened. "Miss Fletcher—this is Miss Ellis, the new girl." Showed her around a bit, took her around the plant enough to learn where things are, and tell her what to do." He added to Nancy. "You'll have some forms to fill out, you can come back and do that later."

"Good luck—Miss Ellis." John Bristow said as she passed him. "I hope you like it here."

She flashed him a grateful smile.

"Thank you—I'm sure I will."

As she went out the door she heard his voice saying, "Grimsahaw, another of our trucks—just this afternoon—and the thin, almost whining voice of the office manager answering, "I know, I know—but we're doing everything we can—"

Miss Fletcher indicated a desk with a wave of her hand. "That's your desk. You can keep your purse in it if you like. I'll show you where your locker is." She led the way past a row of desks whose occupants stared openly and curiously at Nancy, pausing beside one and pointing to a stack of work.

"I've got to finish that before I leave tonight. And every minute I spend showing you around is going to make me just that much later."

Nancy wondered if she ought to offer an apology, or suggest that she help make up the lost time. She decided it was best to keep meekly quiet, however. The angular Miss Fletcher didn't look as though she would welcome friendly overtures.

She learned the location of the lockers, the lunchroom, the washroom and the water-cooler, and then the tour of the plant began. It was necessary, Miss Fletcher explained, to know where every department was. As the tour continued, however, Nancy only grew more confused. Her guide's voice was lost in the noise of machinery, she only knew that she was following blindly through a succession of places that were full of heat, racket and strange metallic odors.

Suddenly as they approached a tool bench, she stopped short.

The young man, in overalls who swung around to stare at her was tall and lean, with rumpled brown hair and smiling grey eyes that looked at her from a deeply tanned, homely face.

Tom Cantwell! Only a few hours ago she had been wondering where he was.

She started forward, her face shining with pleasure surprised, only to stop dead in her tracks.

For Tom Cantwell, who had known her most of her life, looked at her coldly for a minute, without a sign of recognition and then without a single word, turned his back to her and went on with the work he had been doing.

(To Be Continued)

World's First Tube Railway

The world's first tube railway and Great Britain's first electrified railway, which has just passed its 50th birthday, still operates as part of the vast underground network of the London Passenger Transport Board.

The original line, known as the City and South London railway, constructed in 1890, ran from King William Street in the City of London to Stockwell.

The Swiss are the world's greatest milk drinkers, consuming an average of 232 quarts per person annually.

The bloodhound is the only dog whose "testimony" is accepted as evidence in a court of law.

Food For War Prisoners

Canadian Red Cross Sending Five Thousand Parcels Per Week

The packing of parcels of food for British and Canadian prisoners of war in Germany was begun in the summer of 1940.

An advance camp was established in this area during the past summer when one of the two Eskimos to be entrusted with the care of the prisoners was sent to the Anderson and Horton Rivers.

Five thousand food parcels, each weighing about eleven pounds and containing a well-balanced diet,

are being packed in Toronto each week, and in the near future another five thousand parcels per week will be packed in Montreal.

This undertaking of ten thousand food parcels a week will cost the Canadian Red Cross about a million and a half dollars a year and was one of the main items stressed in the society's recent nation-wide appeal for funds.

The parcels will go from Canada to New York and then on to Lisbon on American export liners. At Lisbon they will be taken over by the International Red Cross Committee and shipped to Geneva. The committee handles the distribution through its representatives in Germany, and guarantees safe delivery of the parcels.

The request for the supplying of these food parcels from Canada came from the British Red Cross, which is the auxiliary of the British government committed to the feeding of prisoners in enemy territory. The work in England has slowed up owing to Nazi bombing, and that is why the Canadian Red Cross has been asked to help Britain in this undertaking.

Dr. Fred W. Routley, National Commissioner, explained:

"We can't do nothing unless one's mind is made up whether or not our prisoners receive these parcels of food when it is considered that the British Red Cross has been sending thousands of parcels to British prisoners in enemy territory for months and months now. We can't do nothing unless one's mind is made up whether or not our prisoners receive these parcels of food when it is considered that the British Red Cross has been sending thousands of parcels to British prisoners in enemy territory for months and months now. We can't do nothing unless one's mind is made up whether or not our prisoners receive these parcels of food when it is considered that the British Red Cross has been sending thousands of parcels to British prisoners in enemy territory for months and months now. Soldiers Express Their Thanks For Cigarettes

Many Letters Received by Legion Officials; Percy Snow Widely Travelled; Letters Received From L. McLeod and G. Stephens.

Letters continue to be received by the local branch of the Canadian Le-

gion expressing thanks for cigarettes received by the Coleman boys in England. Here are a few received this week, written in November:

"Members of Coleman Canadian Legion: The cigarettes you sent me arrived safely and I wish to thank you all for your thoughtfulness. It is a nice feeling to know those at home have not forgotten us."

"We have moved around quite a lot since landing but I think we are settled for the winter now. We have plenty of work for our unit here."

N.C.F. TONIC "Neo Chemical Food"

A delicious Vitamin and Mineral Food Supplement to aid in building resistance to infections such as Colds, Prevention of Rickets, Prevention of Tooth Decay, etc.

Also as a Tonic for Run Down Condition following Colds and other illness.

Greatest Adventure Romance of all time!

"I've enjoyed seeing the Old Country. Since being here my work takes me everywhere. I travel every day and so get to see a lot of country. Thank you all again for your kindness.—Percy Snow."

"Dear Sirs: I wish to take this opportunity to express my sincere gratitude for your gift of Sweet Caporal cigarettes which I received the other day. As Sapper Ugo DeCoco does not write very well in English he asks me to thank you for his too.—Spr. A. L. McLeod."

"Dear Comrades: Just a line to thank you for smokes just received. We don't see many of the boys from the Crow's Nest now as we are busy building. In fact we have been for three months. We have been having quite a few air raids but we are getting quite used to them. Thanking you again I will close wishing you all a Merry Christmas and a Happy New Year.—Spr. Geo. H. Stephens."

"Troops VISITING
WINDSOR CASTLE
GREETED BY KING

Somewhere in England—It has been marked down as one of the most successful days on record. Here's why:

In the morning men of an infantry holding unit of the 2nd Canadian Division were taken on a free sight-seeing trip to Windsor Castle by A. D. McCrindle, Canadian Legion War Services Supervisor. During their tour of the grounds the King and Queen drove by and His Majesty ordered the car slowed down that he and the Queen might wave friendly greetings to the troops.

When the lads reached the chapel

they were just in time to hear the singing of the famous boys' choir performing a special church service. That was also a treat.

On their return to camp they were guests of the Legion at a free moving picture show. The film was "The Great Barrier," based on the building of the C.P.R., and there were loud cheers from the men when familiar places were shown. After the performance the boys joined McCrindle in an old-fashioned sing-song in the unit's recreation centre.

It must have been the elevating character of the day's entertainment that did it, but there was a noticeable absence of "Roll Out the Barrel" type of tunes. Opera, no less, was the favourite melody. And to wind it up the lads sang "The Old Rugged Cross" with honest reverence.

It is sufficient proof, believes

In Memoriam

HOLLY—In loving memory of William and Betty Holly, who died Dec. 10, 1932 and Jan. 19, 1938. Ever remembered by Rebecca and Soni Holly.
